I support the construction of a new service station at junction 24 M5. The current one is no longer fit for the amount of traffic needing to use it, causing daily traffic jams and congestion. With more development now starting on the Gateway site this roundabout will get worse.

I don't support the proposal of a new overnight Truckstop, there is already an established family run Truckstop at Junction 24 that can house 100+ lorries, and is a local employer.

Another Truckstop at the junction could have a major impact on this long established business.
